

To the Automotive Recycling/Dismantling Community in New York:

The enclosed brochure on removing mercury switches from motor vehicles is being provided to you as a joint effort between the auto industry and the New York State Department of Environmental Conservation.

The information contained in this brochure will help you understand the need to remove mercury switches from motor vehicles before they are disposed of and also provide you with information on how to properly remove these switches.

Included with the brochure is a list of organizations that recycle mercury, some of which are located in New York. There is also a list of the regional offices of the NYSDEC that you may contact with any questions.
